

The CSE Global (Australia) group of companies provides engineering, integration, installation, commissioning and servicing of instrumentation, power conversion, power protection, automation and telecommunications systems, including managed rental systems and product sales.

CSE recognises that we owe a duty of care to the natural environment and the communities in which we operate, supporting a philosophy of 'Cleaner Operations' and 'Sustainability'.

We are therefore committed to taking all reasonable steps to ensure that business activities are planned and conducted to minimise and, where possible, avoid adverse impacts on the natural environment and social surroundings for the benefit of both current and future generations.

To achieve this aim we:

- Maintain an Environmental Management System (EMS) consistent with the requirements of ISO 14001, ensuring that business operations are conducted in a manner so as to eliminate or minimise any adverse environmental impacts
- Set appropriate and sound environmental objectives and targets which will be regularly reviewed to ensure they remain relevant, and continually improve environmental performance
- Empower management to accept responsibility for the effective implementation of the Environmental Management System

- Observe and implement, as a minimum, the Acts, Regulations, Standards and other requirements that apply to our business in order to ensure compliance
- Conduct and participate in environmental impact assessments, implement environmental management programs and action plans, and monitor such programs and plans

- Develop methods to conserve resources by reducing, reusing and recycling, and seek to prevent pollution before it is produced
- Provide environmental training and awareness programs to our employees, and encourage individual involvement with environmental issues
- Continuously seek opportunities to improve adherence to these principles and improve the effectiveness of the EMS

We engage our employees to support our Environmental Management System by:

- Providing knowledge and awareness of the CSE Environmental Policy, and emphasising the importance of adherence with its purpose
- Identifying and addressing any non-conformance with our environmental policy and values
- Effectively communicating environmentally friendly ideas and opportunities for improvement

Roy Rowe
